

**grade A  
classroom**

Self reflection  
grid

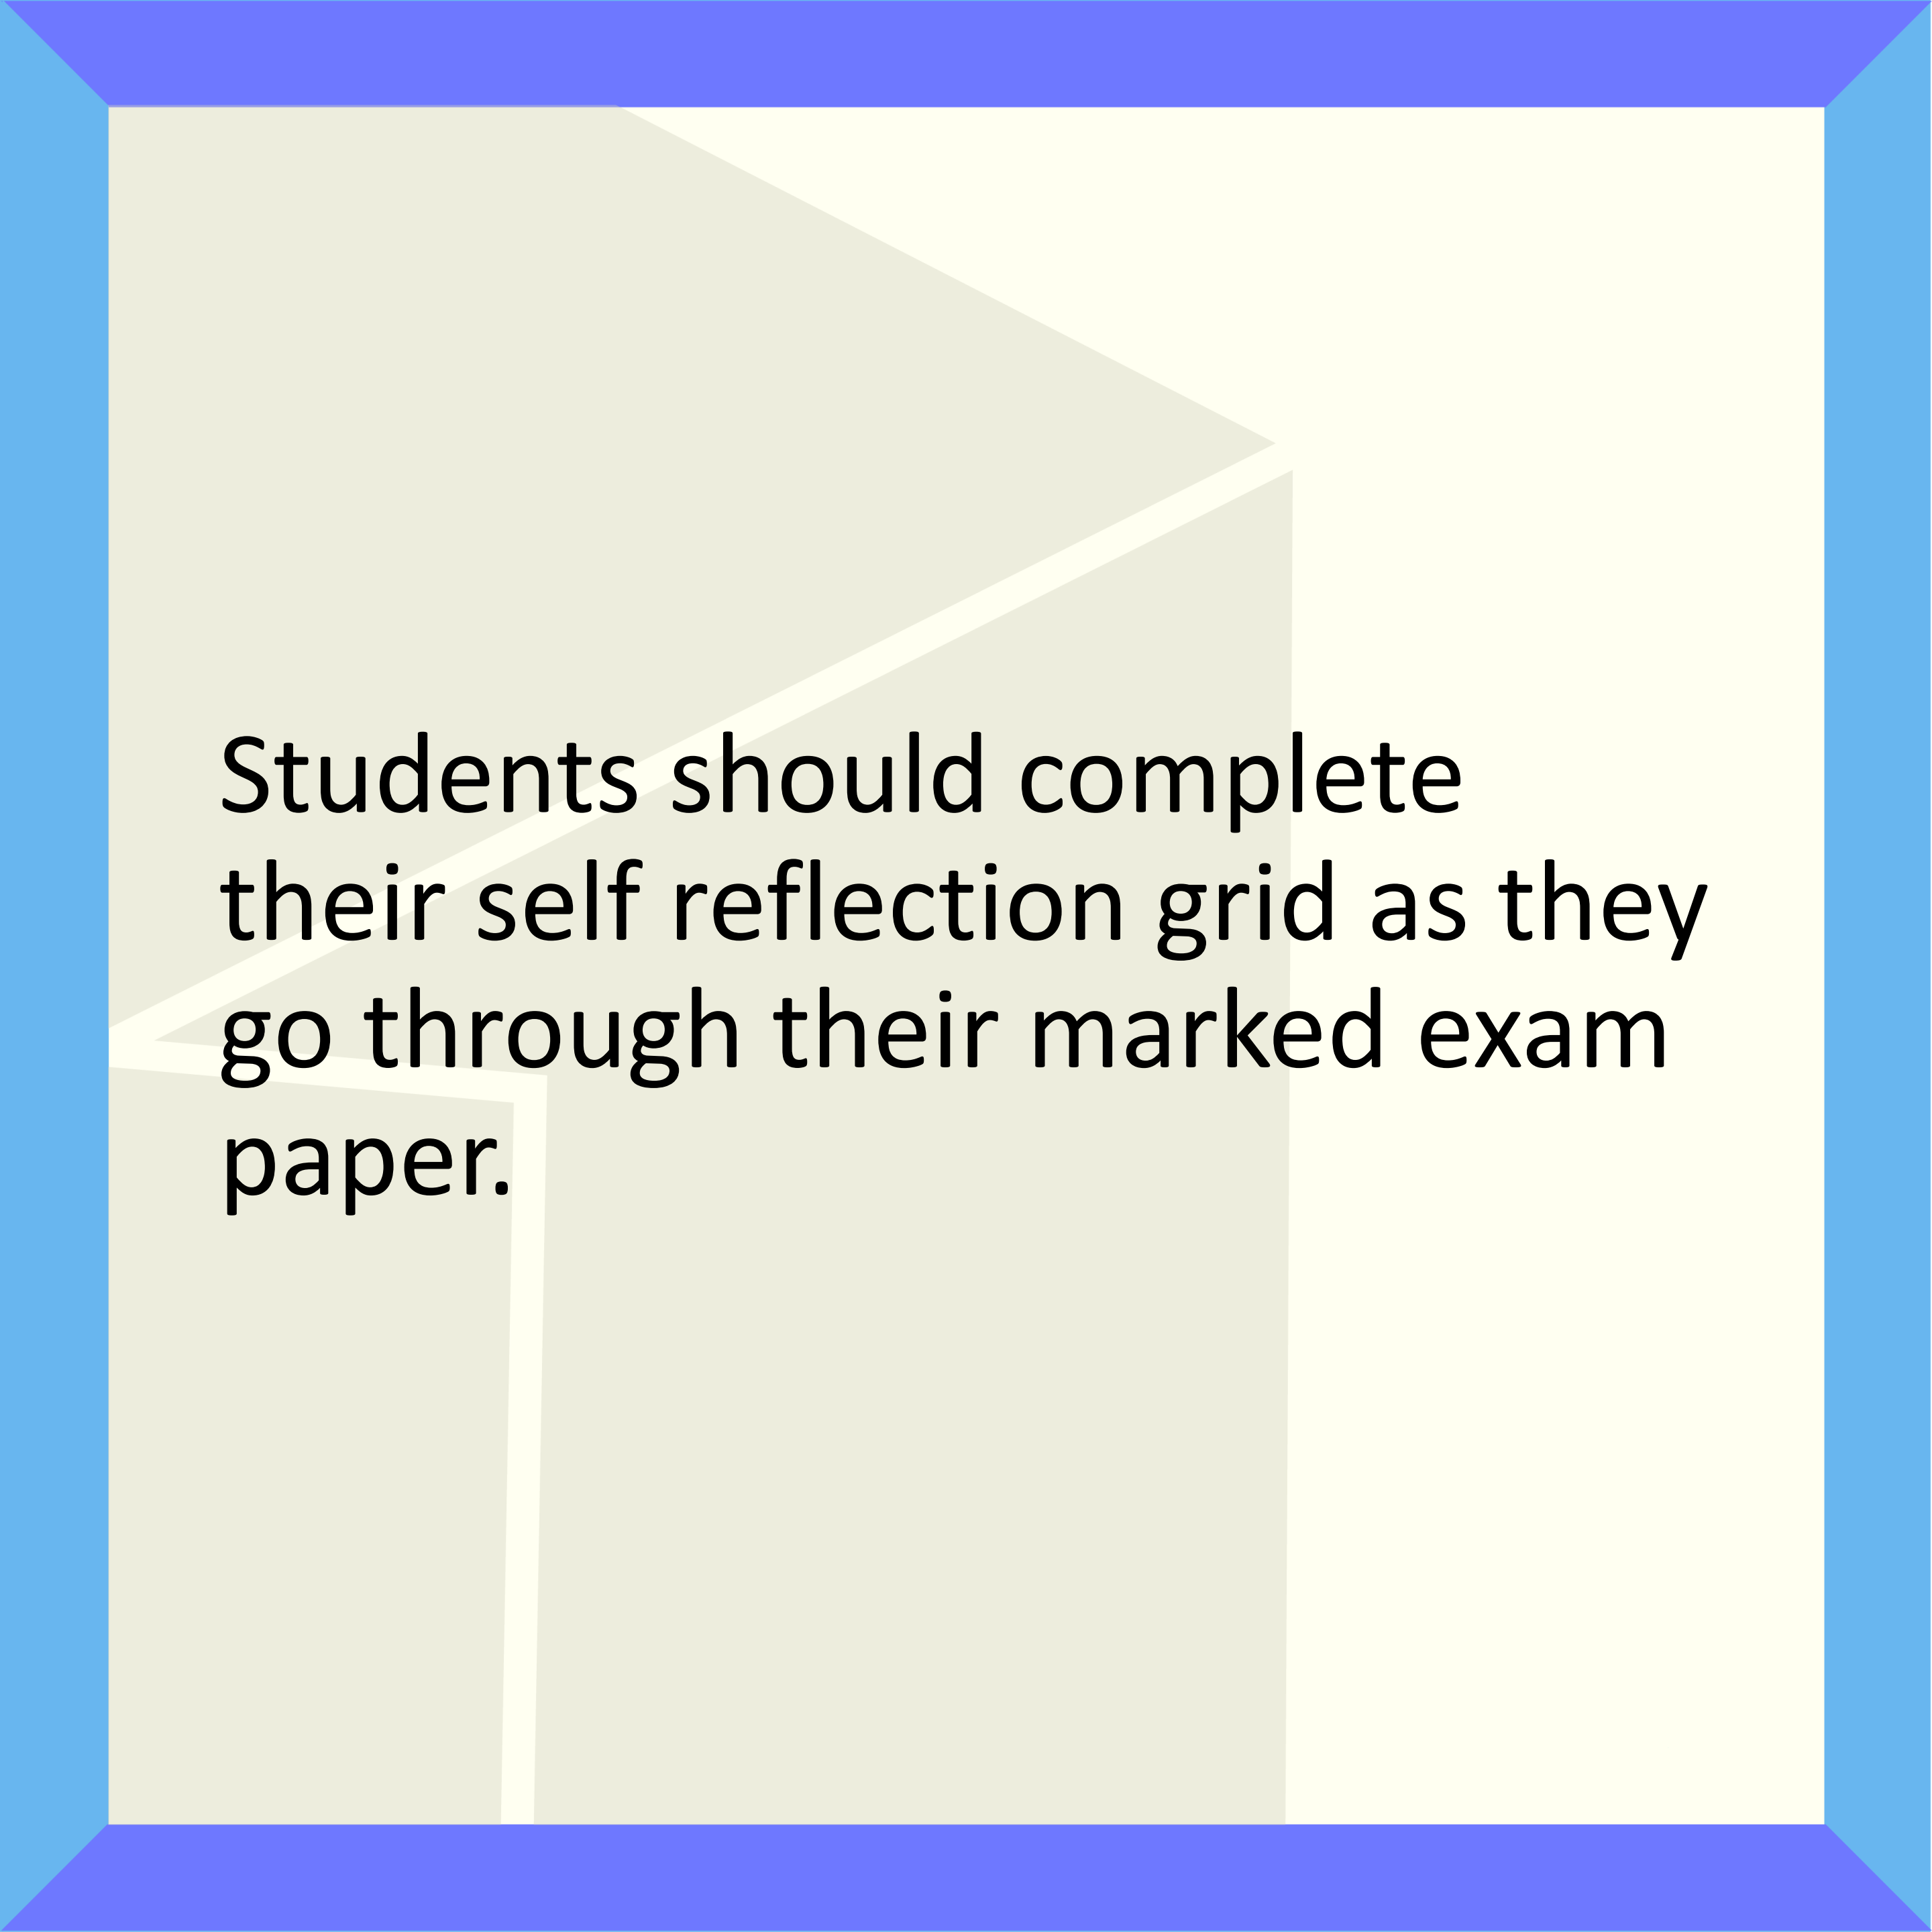

Provide your students with  
a reflection grid that looks  
like this...

Question	Topic	Score	WWW	EBI
1				
2				
3				
4				
etc				

***WWW: What Went Well***

***EBI: Even Better If***

Students should complete  
their self reflection grid as they  
go through their marked exam  
paper.

*For example...*

Question	Topic	Score	WWW	EBI
1	Atomic structure	6/8	I could correctly label an atom and state the mass & charge of the subatomic particles.	I could use the structure of the atom to explain reactivity.
2				
3				
4				
etc				

The completed reflection grid can be used as a teacher-student conversation aid to discuss how the student can be supported and how they can improve.

Homework tasks could be set to ensure students are working on their EBI's.
