

**grade A  
classroom**

Find someone  
who can

This strategy can be used  
in a couple of ways...

Write the title of a topic on the board.

e.g. Fractional Distillation of Crude Oil

Students need to

- **Recall** what it is
- **Describe** what happens
- **Explain** how it works

# Opportunity to collaborate

Students move around the room  
and **find someone who can**  
Recall, Describe and Explain.

Once they have spoken to each  
other, they can return to their  
work and improve their answers.

# Another use of this strategy

Students create their own Recall, Describe, Explain questions about a topic.

They move around the room and **find someone who can** answer them.

This is good as a revision activity at the end of a topic or as a plenary to review the lesson.
