Attention cards

Attention cards can be used
to encourage good listening.

For example,

Give students a card that looks like this:

| | | |
|---|---------------|----------------|
| Listen very carefully every time the teacher speaks and cross off each word when you hear them. If you hear the word again, put a tally next to it. | | |
| <i>particle</i> | <i>heat</i> | <i>vibrate</i> |
| <i>solid</i> | <i>expand</i> | <i>energy</i> |
| Now use these words to write a short summary of what this lesson was about: | | |

Making bespoke attention cards for each lesson/topic is time consuming. Blank cards can be downloaded from my website soon and words can be quickly added when needed.

Listen very carefully every time the teacher speaks and cross off each word when you hear them. If you hear the word again, put a tally next to it.

Now use these words to write a short summary of what this lesson was about:

To put the onus on students even more, students could select 6 keywords for each other to listen out for.
